

US and Canadian Return Reason Codes

Created by William L. Saffici

This document was created to provide US Banks with an understanding of the differences in Return Reason Codes they will encounter when presenting deposited Canadian Cheques in an electronic manner (X9.100-187) to a Canadian Bank. Additionally, an explanation of the occurrences when a deposited return item may be "re-exchanged" (different than represented) is included.

The **sources** used to create this document are:

1. ANSI X9.100-187 (2008) - US Standard for Electronic Exchange of Check Images
2. Canadian CPA Standard 015 (April 2014) - Canadian Companion Document to X9.100-187 (2008) for Electronic Exchange of Canadian Cheque Images

The "**Code Match**" list is a "side-by-side" list of the Return Codes used by the US and Canada with their brief description. The YELLOW highlight identifies the codes that have a different meaning in the respective countries.

The "**Reason Match**" list aligns the Return Reasons used by the US and Canada that are the same but have different codes. The list also shows the Return Reasons of the respective countries that do not have a match with the other country. The Canadian portion of the list also includes the Time Limit for Return for those that can be returned later than "next business day". It also identifies how the Return can be handled when the forward presentment was electronic (X9).

The "**Re-Exchange Matrix**" list identifies the return reasons that are eligible to be presented as a new item and the possible manner to accomplish same.
